

LEISTUNGSERKLÄRUNG

Nr. 0031 – DE

1. Eindeutiger Kenncode des Produkttyps: **fischer Nagelanker FNA II**

2. Verwendungszweck(e):

Produkt	Verwendungszweck (e)
Metallanker zur Verwendung in Beton zur Befestigung von leichten Systemen	zur Verwendung in redundanten Systemen zur Befestigung und/oder Verankerung von Bauteilen z.B. leichten abgehängten Decken, sowie von Installationen am bzw. im Beton, siehe Anhang, insbesondere Anhänge B 1 bis B 2

3. Hersteller: **fischerwerke GmbH & Co. KG, Klaus-Fischer-Straße 1, 72178 Waldachtal, Deutschland**

4. Bevollmächtigter: --

5. System(e) zur Bewertung und Überprüfung der Leistungsbeständigkeit: **2+**

6a. Harmonisierte Norm: ---

Notifizierte Stelle(n): ---

6b. Europäisches Bewertungsdokument: **ETAG 001; 2016-04**

Europäische Technische Bewertung: **ETA-06/0175; 2016-10-28**

Technische Bewertungsstelle: **DIBt**

Notifizierte Stelle(n): **1343 – MPA Darmstadt**

7. Erklärte Leistung(en):

**Mechanische Festigkeit und Standsicherheit (BWR 1)**

Wesentliches Merkmal	Leistung
Charakteristische Werte	Siehe Anhang, insbesondere Anhang C 1

**Brandschutz (BWR 2)**

Wesentliches Merkmal	Leistung
Brandverhalten	Der Dübel erfüllt die Anforderungen der Klasse A 1
Feuerwiderstand	Siehe Anhang, insbesondere Anhang C 2

**Sicherheit bei der Nutzung (BWR 4)**

Wesentliches Merkmal	Leistung
Charakteristische Werte für Zug- und Querbeanspruchung	Siehe Anhang, insbesondere Anhang C 1

8. Angemessene Technische Dokumentation und/oder Spezifische Technische Dokumentation: ---

Die Leistung des vorstehenden Produkts entspricht der erklärten Leistung/den erklärten Leistungen. Für die Erstellung der Leistungserklärung im Einklang mit der Verordnung (EU) Nr. 305/2011 ist allein der obengenannte Hersteller verantwortlich.

Unterzeichnet für den Hersteller und im Namen des Herstellers von:

Andreas Bucher, Dipl.-Ing.

Wolfgang Hengesbach, Dipl.-Ing., Dipl.-Wirtsch.-Ing.

Tumlingen, 2016-11-04

- Diese Leistungserklärung wurde in verschiedenen Sprachversionen erstellt. Für den Fall unterschiedlicher Auslegung hat immer die englische Version Vorrang.
- Der Anhang enthält freiwillige und ergänzende Informationen in englischer Sprache. Diese gehen über die (sprachneutral angegebenen) gesetzlichen Anforderungen hinaus.

**Specific Part**

**1 Technical description of the product**

The fischer nail anchor FNA II is an anchor made of galvanised steel, stainless steel (marking "A4") or high corrosion resistant steel (marking "C") which is pushed into a drilled hole and expanded by loading.

The product description is given in Annex A.

**2 Specification of the intended use in accordance with the applicable European Assessment Document**

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

**3 Performance of the product and references to the methods used for its assessment**

**3.1 Mechanical resistance and stability (BWR 1)**

The essential characteristics regarding Mechanical resistance and stability are included under the Basic Works Requirement Safety in use.

**3.2 Safety in case of fire (BWR 2)**

Essential characteristic	Performance
Reaction to fire	Anchorage satisfy requirements for Class A1
Resistance to fire	See Annex C 2

**3.3 Safety in use (BWR 4)**

Essential characteristic	Performance
Characteristic resistance for all load directions	See Annex C 1

**4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base**

In accordance with guideline for European technical approval ETAG 001, April 2013 used as European Assessment Document (EAD) according to Article 66 Paragraph 3 of Regulation (EU) No 305/2011 the applicable European legal act is: [97/161/EC].

The system to be applied is: 2+

**Only for multiple use for non-structural applications according to ETAG 001 Part 6 Annex 1**

**Design types:**

FNA II 6x25/..  
FNA II 6x30/..

FNA II 6x25/.. RB  
FNA II 6x30/.. RB

FNA II 6x25 M6/..  
FNA II 6x30 M6/..

FNA II 6x25 M8/..  
FNA II 6x30 M8/..

FNA II 6x25 OE  
FNA II 6x30 OE

**Intended use:**

Additional marking only galvanised steel for  $h_{ef} = 25$  mm (centring, bar or points)

**fischer nail anchor FNA II**

**Product description**  
Product and intended use

**Annex A 1**

**Marking:**

**Nail head**

Marking at **X**: "O" for  $h_{ef} = 25$  mm  
and "I" for  $h_{ef} = 30$  mm;

Marking at **Y**:  $t_{fix}$

Marking at **Z**: "A4" or "C" (stainless steel)

**Expansion sleeve (or bolt)**

e.g.:

For stainless steel additional marking "A4" or "C"

**Marking-Codes for Y:**

	A	Q	T	N	P	B	L	H	U
$t_{fix}$	5	10	15	20	25	30	35	40	45
	D	V	S	W	X	E	M	Z	K
$t_{fix}$	50	55	60	65	70	75	80	85	90
	(A)	F	(B)	(D)	(E)	G	J		
$t_{fix}$	95	100	105	110	115	120	125		

At  $t_{fix} > 125$  mm the corresponding figure is marked.

**Shaft (threaded bolt)**

Marking e.g.: 6/10  
thread size/thickness of the fixture

Marking e.g.: 8/10  
thread size /thickness of the fixture  
Exception: 8/5 no marking

**Table A1: Materials**

<b>Designation</b>	<b>Material:</b> Galvanized steel

**Product description**  
Marking and materials

**Annex A 2**

### Specifications of intended use

**Anchorage subject to:**

- Static and quasi-static loads: All types and all embedment depths
- Fasteners are only to be used for multiple use for non-structural applications, according to ETAG 001 Part 6, Edition January 2011
- Fire exposure: only for concrete C20/25 to C50/60

**Base materials:**

- Reinforced and unreinforced normal weight concrete according to EN 206-1 : 2000
- Strength classes C12/15 to C50/60 according to EN 206-1 : 2000
- Uncracked and cracked concrete: All types and all embedment depths

**Use conditions (Environmental conditions):**

- Structures subject to dry internal conditions (gvz, A4, C) with  $h_{ef} \geq 25$  mm
- Structures subject to permanently damp internal condition, if no other particular aggressive conditions exist (A4, C) with  $h_{ef} \geq 25$  mm
- Structures subject to external atmospheric exposure including industrial and marine environment, if no particular aggressive conditions exist (A4, C) with  $h_{ef} \geq 30$  mm
- Structures subject to external atmospheric exposure and to permanently damp internal condition, if other particular aggressive conditions exist (C) with  $h_{ef} \geq 30$  mm

Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution(e.g. in desulphurization plants or road tunnels where de-icing materials are used.)

**Design:**

- Anchorages have to be designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings have to be prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Anchorages under static or quasi-static actions have to be designed in accordance with:
  - ETAG 001, Annex C, design method C, Edition August 2010 or
  - CEN/TS 1992-4: 2009, design method C
- Anchorages under fire exposure have to be designed in accordance with:
  - EOTA Technical Report TR 020, Edition May 2004
  - CEN/TS 1992-4: 2009
  - It must be ensured that local spalling of the concrete cover does not occur

**Installation:**

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Create drill hole with hammer drill and clean the hole
- Anchor installation such that the effective anchorage depth is complied with. This compliance is ensured, if the admissible thickness of the fixture is kept. For the anchor type FNA II  $6 \times h_{ef}$  OE the loop has to sit direct at the concrete surface.
- In case of aborted hole: New hole must be drilled at a minimum distance of twice the depth of the aborted hole or closer, if the hole is filled with a high strength mortar and only if the hole is not in the direction of the oblique tensile or shear load

<b>fischer nail anchor FNA II</b>	<b>Annex B 1</b>
Intended Use Specifications	

**Table B1: Installation parameters**

Effective embedment depth	$h_{ef} \geq$	[mm]	25	30
Nominal drill bit diameter	$d_0$	[mm]	6	
Cutting diameter of drill bit	$d_{cut} \leq$	[mm]	6,4	
Depth of drill hole	$h_0 \geq$	[mm]	31	36
Diameter of clearance hole in the fixture for all FNA II except for M8 and OE	$d_f \leq$	[mm]	7	
Diameter of clearance hole in the fixture for M8	$d_f \leq$	[mm]	9	
Maximum torque moment (only threaded types)	max. $T_{inst}$	[Nm]	4	
Minimum thickness of member	$h_{min}$	[mm]	80	
Maximum thickness of fixture	max. $t_{fix}$	[mm]	400
